

Corrigendum

The second last line in CS403 handouts, page 146 which is “*Data manipulation languages are used to carry out different operations like insertion, deletion or creation of database.*” is written by mistake. The correct line is “*Data manipulation languages are used to carry out different operations like insertion, deletion and updation of data in database.*”

This mistake has been corrected in the handouts printed after AUG 22 2011, and updated handouts have also been uploaded on the VU-LMS.
