

How to Run A Simple SNOBOL Program

- 1) Download the Compiler from VU-LMS <http://vulms.vu.edu.pk/Courses/CS508/Downloads/snobol4.zip>
- 2) Extract the file **snobol4.exe** (e.g. I have extracted the file in desktop folder in my Z drive)
- 3) Download the sample code file from **TEST.SNO** VU-LMS **(It is simple text file you can view and edit in notepad)**<http://vulms.vu.edu.pk/Courses/CS508/Downloads/TEST.SNO>
- 4) Put the **TEST.SNO** in the same directory where **snobol4.exe** is
- 5) Enter the following command **SNOBOL4 TEST /q;** you will see the output of the program if there is no error.

```
C:\WINDOWS\system32\cmd.exe
Z:\Desktop>SNOBOL4 TEST /q;
The Minnesota SNOBOL4.2 Interpreter: Version 2.04
