

Cygwin Net Release Setup Program

This setup program is used for the initial installation of the Cygwin environment as well as all subsequent updates. Make sure to remember where you saved it.

The pages that follow will guide you through the installation. Please note that Cygwin consists of a large number of packages spanning a wide variety of purposes. We only install a base set of packages by default. You can always run this program at any time in the future to add, remove, or upgrade packages as necessary.

Setup.exe version 2.573.2.3

Copyright 2000-2007

Choose A Download Source

Choose whether to install or download from the internet, or install from files in a local directory.

- Install from Internet
(downloaded files will be kept for future re-use)
- Download Without Installing
- Install from Local Directory

Select Root Install Directory

Select the directory where you want to install Cygwin. Also choose a few installation parameters.

Root Directory

L:\Cygwin

Browse...

Install For

- All Users (RECOMMENDED)
Cygwin will be available to all users of the system. NOTE: This is required if you wish to run services like sshd, etc.
- Just Me
Cygwin will only be available to the current user. Only select this if you lack Admin. privileges or you have specific needs.

Default Text File Type

- Unix / binary (RECOMMENDED)
No line translation done; all files opened in binary mode. Files on disk will have LF line endings.
- DOS / text
Line endings will be translated from unix (LF) to DOS (CR-LF) on write and vice versa on read.
[Read more about file modes...](#)

Select Local Package Directory

Select a directory where you want Setup to store the installation files it downloads. The directory will be created if it does not already exist.

Local Package Directory

\\homes\users\basit\My Documents\setup

Browse...

Select Your Internet Connection

Setup needs to know how you want it to connect to the internet. Choose the appropriate settings below.

Direct Connection

Use IE5 Settings

Use HTTP/FTP Proxy:

Proxy Host

Port
